BRAND STORY

With over 26 years' experience in designing, engineering and manufacturing luxury brassware, FLOVA delights in transforming the highest quality raw materials into distinctive, highly functional and desirable solutions for the bathroom.

At the heart of what we do are our customers' needs and the principles of Practical Aesthetics. We take innovative influences from the West and combine with incomparable craftsmanship, meticulous attention to detail, the highest design values, quality and engineering excellence. This holistic fusion of form and function has won us accolades from designers and consumers worldwide.

It is important to us that the tastes, lifestyles and personalities of our end users are reflected in the timeless design of our carefully curated brassware collections. Even with 30 ranges to choose from, we constantly strive to improve by developing new styles, increasing comfort and adding new functions - so we can continue to offer the ultimate washing and bathing experience.

The practicality of manufacturing premium bathroom brassware means our techniques and processes must always be leading edge. So, from choosing raw materials to mould development, casting, smart machining, electroplating, automated polishing, coating and finishing, our standards are the highest. We have also achieved vital approvals such as UPC (US), WRAS (UK), EN817 (EN) to protect the health, safety and trust of our customers.

FLOVA MANUFACTURING CENTER

CERTIFICATES OF DRINKING WATER SAFE

Our products have passed strict standards such as UPC, NSF in the USA and the new Chinese standard for safe metal educt.

CUPC Certificate

NSF 372 Certificate

NSF 61-9 Certificate

Metal Contaminants Safety Certificate

GLOBAL SOURCING HIGH-QUALITY COMPONENTS

FLOVA selects the best suppliers worldwide and tests each component repeatedly to achieve the best assembly.

Neoperl Aerator

Vernet Thermostatic Cartridge

Kerox Cartridges

Flühs Side Valves

Neoperl PVC Shower Hose

PRECISION PRODUCTION

The quality of FLOVA is a result not only due to its excellent functional design, but also from advanced manufacturing techniques and global supply chain.

Robotic polishing to guarantee a smooth finish on every product.

80% of the machining procedure done at one setting due to efficient computerized programming and large pool of the tool magazine.

The application of fully automatic smart manufacturing enhances quality further, improves accuracy and stability of products, and thus brings ongoing reliable user experiences for customers.

Automatic plating lines to ensure the stability of FLOVA stunning chrome finish along with other colorful finishes such as Brushed Nickel, Matt Black, Golden PVD, and Oil-Rubbed Bronze.

A woman with long dark hair is shown from the back, looking up and reaching out with her hands towards a wide, modern showerhead. The showerhead is mounted on a light-colored wall and has two distinct water jets: a vertical rain-style jet on the left and a horizontal waterfall-style jet on the right. The woman's hair and skin are wet, and water is splashing around her. The background is a plain, light-colored wall.

SHOWER TECHNOLOGY **PLEASURABLE EXPERIENCE**

FLOVA keeps on design innovation and creates chic bathroom styles to cater for people in the modern era. The combination of delicate appearances, functions and structures allows people to focus on their feelings brought by the bathroom comfort and convenience.

The rainshower is not only a tool to turn on and off the shower but also a way to bring a new life style. Taking the human needs into deep consideration, FLOVA innovates on the appearances, techniques and functions to complete more upgrades on shower.

SWIVEL SPOUT AS DIVERTER

SIMPLICITY WITH INTEGRATED DIVERTER DESIGN

Swivel in 180-degree from left to right to easily change between the three ways of outlet. Avoid the traditional lift diverter for swivel to make more space left.

AIR-MIX RAINSHOWER

20% WATER SAVING

The design of rainshower outlet fully helps save water, without reducing the comfort of showering, achieving up to 20% water saved.

WATERFALL OUTLET TECHNOLOGY

ENJOY A DIFFERENT SHOWER PLEASURE

Waterfall outlet, vividly like a cascade, brings the perfect shower pleasure.

FINISH TECHNOLOGY

COLOR IN TIMELESS CLASSIC

Classic colors remain in ageless time and glitter in a purer shade enriched by the pearl of time.

FLOVA gives products with diversity by mature plating technology. Polished Chrome, Luxury Gold, ORB, Matt Black and Brushed Nickel, each finish stands for a kind of life style, fashion and character. Meanwhile, it also represents the exploring for the value of water.

GoClick TECHNOLOGY

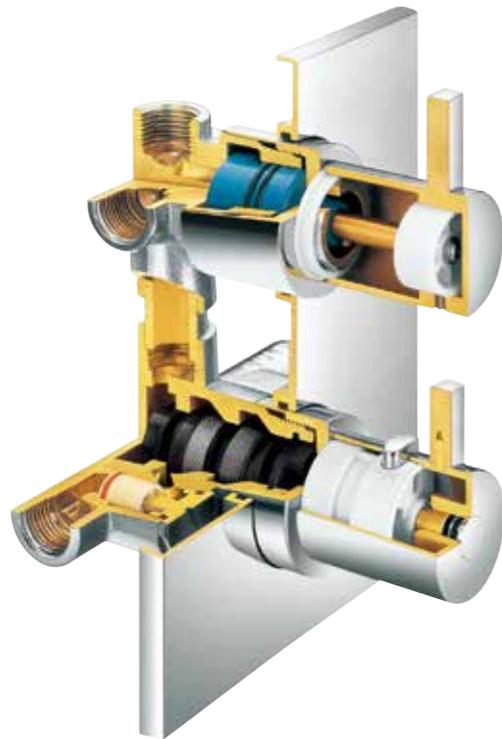

CLICK AND GO

By the smart mechanic motion of GoClick, just one click and go for a shower. Each water flow is controlled independently. The inclusion of 45mm valve can endure various water flows simultaneously, thus a SPA is on.

26 YEARS OF RESEARCH ON WATER FLOWS

PROFESSIONAL MANAGEMENT SYSTEM OF WATER FLOWS

Excellence in water flows assures strength and leakproofness of valves. Due to the shower comfort, concise design and natural combination with bathrooms, our products become more and more popular in prestigious hotels and estate management.

FLOVA concealed thermostatic valves are comprised of French Vernet thermostatic valves and German Neoperl check valves.

LOVE GIVEN TO FAMILY THROUGH WARMTH

**LOVE GIVEN PRECISELY AT EACH MEASUREMENT
38°C, A TEMPERATURE OF LOVE SET FOR FAMILY**

The design behind FLOVA thermostatic faucets is unique for the mixed water surrounding hot water, thus avoiding being burned. The considerate design in the safety lock makes sure only when the safety button is pressed that the water temperature can be turned above 38°C, in case of mishandling.

**LOCK IN ENDURABLE WARMTH IN BATHROOM
FAREWELL TO BEING TOO HOT OR TOO COLD.
MAKE EACH SHOWER AN ENJOYMENT.**

Thermostatic faucets can keep stable and precise water temperature and make sure your shower joy would not be interrupted by a sudden change in water temperature when someone turns on faucets in the basin or in the kitchen.

SMART TOUCH, DUAL CONTROL SYSTEM

COMPETENT ASSISTANT IN THE KITCHEN

Simply a touch can turn on or off the faucet. The FLOVA Smart Touch technology can not only ignite your interest in cooking, but also saves cleaning time. No matter how messy the kitchen is, the faucet remains clean by itself on the appearances.

THE ART OF QUALITY
**26 YEARS OF
CRAFTSMANSHIP**

ONLY FOR YOUR BETTER SHOWER EXPERIENCE

NEWS 2017

REPRESENTING PRAGMATIC AESTHETICS

FLOVA introduces two brand new ranges Spring and Fusion, which are inspired by nature and have swift water flows made possible thanks to advanced casting technologies. The extra thin design of spout is a must to be looked forward to in the bathroom.

GoClick TECHNOLOGY

CLICK AND GO

By the smart mechanic motion of GoClick, just one click and go for a shower. Each water flow is controlled independently. The inclusion of 45mm cartridge can endure various water flows simultaneously, thus a SPA is on.

FH 7308A-D117

Single lever concealed mixer (with GoClick-4 buttons)

MIX AND MATCH OF CONCEALED VALVES

LIMITLESS PERSONALITIES

You can freely choose between the three-button valve and four-button valve to create a combination of your own style together with choices from hundreds of FLOVA concealed parts. The valve body can be easily installed to the wall by a back plate made of stainless steel, bringing a fantastic way of water flows.

FH 7380-D117
Single lever concealed mixer
(with GoClick-3 buttons)

MIX AND MATCH **WITH INTUITIVE GoClick DESIGN**

The GoClick button to control freely from various ways of shower is designed to bring on more shower joy based on advanced technologies. The icon is easy to read and understand in bettering a bathroom design. We feel more confident to offer a better way of life to users by bringing more joy to the bathroom.

Simply a click can independently control the rainshower, waterfall or side sprays.

Due to the Vernet thermostatic valve imported from France, the temperature can be kept at 38°C with tolerance no more than 1°C.

FH 7301A-687 

Thermostatic concealed shower mixer with GoClick-3 buttons

FH 7301A-D117

Single lever concealed mixer with GoClick-3 buttons

Easy handling

The GoClick can control water by one click, which means one single-handle valve can control volume and temperature simultaneously.

Intuitive design

When the GoClick button sticks out, it vividly means water is turned on.

FH 7303A-687 

Thermostatic concealed shower mixer with GoClick-2 buttons

Flexible solutions

Based on the needs for water flows, the number of buttons can be selected for free match.

Clear mark

The laser mark for temperature sets scales clearly, which can be adjusted based on personal needs.

FUSION SERIES

INFUSING COMPLEXITY INTO SIMPLICITY

With a deep understanding of simple being best, we connect the shapes of round and square cleverly and naturally. The details in extra thin spout and lengthened handle express the beauty in life completely.

FH 8236C-6001
Two-handle 8" basin mixer

NEWER TECHNIQUES

BETTER STRUCTURE

Each advance made by FLOVA is dual upgrade both on techniques and structures. The one-piece-cast and lengthened spout applies the new technique of 5mm sand core to create a feel of thinness in design. In structure, the four-hole bathtub faucet has a separate built-in installation of body and base to avoid crash damage to the body during a long period of decoration.

FH 7136C-6002

4-hole bath/shower mixer deck-mounted

GoClick TECHNOLOGY

BETTER BATHROOM SOLUTIONS

Based on your functional needs, the water flows can be designed to cater for your bathroom. It can build complex pipes inside the walls before-hand and thus leave more space in the bathroom.

A simple press can alone control outlets between rainshower, waterfalls and side sprays.

FH 7301-D116
